Zeo Report Month of October 2026

Planner Bill: $900.00
Lawyer Bill: $3150 (Gravel Mines)

Gravel Mines: Deacon, Towne and Aurell, and Green.
The Opinion was distributed to all 3 property owners. Sydney will not be able to attend, but all her communications and questions have been posted on the website and sent to all commission members. I have also created an outline for everyone to review as a starting point.

376, 378, 380, and 382 Bantam Lake Road Camp David: The Commission directed me to send out a letter to the owner of the property. I have not done that yet. I Spoke to Steve Byrne on the phone and he agreed this is the best course of action to let him know that he should abide by the Cease and Desist. I will craft a letter and send it out. I have been in contact with one of the neighbors and they have said things have been substantially quieter.

30 Burgess Road: I will be in contact with the property owner one more time. If the neighbor does not see sufficient movement within the next month, I will send a letter.

194 Todd Hill Road: I have not seen any Warren Valley Oil Trucks when I have been by recently.

198 East Street: American Country Barns: Nothing new here. I have not received any notification from anyone. I have done some research and large commercial trucks do not have a lot of Truck Parking options and it's considered a crisis. There is 1 parking spot available per 11 trucks.

153 East Shore Road: The owners have applied for a Zoning Permit for a single-family ranch style home and are working on getting their building permits next.

314 Bantam Lake Road: I have not noticed anything outside of the ordinary on my trips there. I have been there 4 or 5 times. The one time I went and there was a work truck but it was not on the Brunetto grove side it was on the 314 Bantam Lake Road. They also recently applied for a sign permit, that meets all the requirements of our sign regulations.

355 Bantam Lake Road. I drove by 11/3/2026 and those extra lights were not on in the front. I sent an email out to the property owner to let them know the new lighting should meet the Dark Sky Standards. I sent them the regulations as well.
