Used with permission.
To Falls Village Residents,

This document is the 2024-2034 Plan of Conservation and Development (POCD) for Canaan / Falls Village, Connecticut. The POCD is an official document which outlines a vision for the future of Falls Village and identifies strategies to help make that vision a reality.

The POCD was prepared and adopted by the Planning and Zoning Commission (P&Z). The process of preparing the POCD included a number of activities to encourage public input about important issues in the community and to receive input and feedback on the POCD (on-line survey, community forums, P&Z working sessions, etc.).

Following a public hearing on January 25, 2024, this POCD was adopted with an effective date of February 17, 2024.

Thank you for your interest in the future of Falls Village!

Sincerely,

Planning & Zoning Commission

Fred Laser, Chair                Greg Marlowe
Stephen Koshland, Vice Chair    Matt Macchi
Doug Cohn                       Ruth Skovron
Vincent Inconiglios             Marc Rosen
1.1 Conditions & Trends

This section of the POCD provides a general overview of conditions and trends affecting Falls Village at the time the 2024 POCD was being prepared.

People Of Falls Village

The Census reports that Falls Village had 1,080 residents in 2020. This represents a decrease of about 154 residents since 2010. It is thought that this decrease is mainly the result of an aging population (fewer persons per household).

History of Falls Village

The history of the area we now know as Falls Village began long before written records were kept and continues to modern time. The landform of the area evolved over millions of years as a result of geologic forces. Native Americans are known to have inhabited this area for the past 10,000 years or so. European discovery and settlement of Connecticut by the English and Dutch began in the early 1600s starting along Long Island Sound and the Connecticut River.

Most early settlers were subsistence farmers although the Housatonic River and other waterways supported early mills. The existence of limestone and iron ore spawned a significant iron industry.

Railroad service arrived in the mid-1800s and this resulted in the following:

- The name “Canaan” was given to the station on the Hartford - Albany roadway (now Route 44) and the name “Falls Village” was given to the station near the Great Falls.
- Differences in opinion resulted in a split between the northern and southern parts of the community with the southern part retaining the name “Canaan” and the northern part being named “North Canaan” yet having the village called Canaan within its borders.
- While rail service could have accelerated growth in the local iron industry, it actually made iron from other places more available and resulted in a decline of the iron industry in northwest Connecticut.

After the split with North Canaan, population decreased in Falls Village until starting to increase again after World War II. In the late 1900s, Falls Village became a haven for seasonal residents, much like other parts of Litchfield County.
The age composition of Falls Village has trended significantly older in recent years and almost 60% of the population is over age 50. A changing age composition has implications for schools (such as decreasing enrollments, especially at the elementary level) and other municipal services. This changing age composition can be viewed in a couple of ways:

- Residents aging in place because they love it here,
- New, but older, residents attracted by the rural ambience, and/or
- An inability to attract younger people and families due to factors such as housing costs, modest job availability, distance to jobs, and lack of technology services (broadband, wireless, etc.).

Census information suggests there is population turnover in Falls Village. About one-third of Falls Village residents in 2020 had moved to Falls Village before 2000, about one-third between 2000 and 2010, and the other third since 2010.

While Census data is updated once every 10 years, the American Community Survey (ACS) produces estimates more frequently but based on a small sample size with a margin of error. ACS data can be found at www.censusreporter.org and other data can be found at www.profiles.ctdata.org.
Housing In Falls Village

According to the Census, Falls Village had 639 housing units in 2020. For several decades, Falls Village has been one of the slowest growing communities in Connecticut.

Household sizes in Falls Village (2.42 persons per unit) are smaller than many other communities. Past Census surveys have found that over 60 percent of the housing units in Falls Village were occupied by one or two people.

According to the 2020 Census results, about 19% of the homes in Falls Village are kept for weekend, seasonal, or occasional use (second homes).

About 1.3 percent of the housing units in Falls Village are categorized as affordable housing by the State of Connecticut (assisted housing, CHFA mortgage, rental assistance, deed-restricted). Communities where less than 10 percent of the housing stock meets the state definition are subject to possible judicial override of certain local zoning decisions (see CGS Section 8-30g).

Economy Of Falls Village

A local economy is important in terms of providing for jobs and income for people, ensuring a range of goods and services is available, and providing tax revenue to support local services.

In Falls Village, it is important to note that about 10,216 acres (48%) of 21,248 total acres are tax exempt (owned by the town, state, or federal government or a non-profit entity). In addition, about 3,568 acres (17%) have enrolled in the state’s PA-490 program and receive a reduced assessment. In other words, most of the tax revenue in Falls Village comes from about one-third of the land.

The American Community Survey (ACS) estimates that about 24 percent of all households in Falls Village earn some self-employment income. While the ACS estimated the 2021 median household income in Falls Village was $80,938, about 36% of the households in Falls Village earn less than $50,000 per year.
Zoning In Falls Village

A zoning map is used to identify what types of land uses are allowed in different areas of a community. A scalable PDF version of the Falls Village Zoning Map may be found at [www.canaanfallsvillage.org](http://www.canaanfallsvillage.org).

The vast majority of land in Falls Village is zoned for residential purposes. There is a Village Business zone in the Village Center and some other business / industrial zones in outlying areas (Rural Business, Light Industrial, Quarry).

There are also three zoning districts which overlay the other districts to protect sensitive resources (Housatonic River corridor, steep slopes, and floodplains).
1.2 Community Accomplishments & Celebrations

As part of the planning process, the Planning and Zoning Commission conducted several exercises to get input and insight from residents and business owners:

- An on-line survey,
- A survey of members of local boards and commissions, and
- An in-person workshop meeting.

From the on-line survey, it was learned that the characteristics that were most important in attracting people to Falls Village included:

- Community characteristics / ambience, etc. 89%
- Ruralness / small town 84%
- Housing type / value / affordability 82%
- Location (close to work, close to family, etc.) 61%
- Town amenities / services 56%
- Education system 53%

In other words, the top three attributes were:

- The physical appearance / character,
- The feeling people get from our unique community, and
- The availability of housing that meets their needs.
Also from the on-line survey, residents identified a variety of things they were “proud of” about the community:

<table>

1.3 Community Issues & Concerns

The on-line survey also gave participants the opportunity to identify things they were “sorry about” in the community. Some of the key issues written in by participants were categorized as follows:

- Discord (63).
- Lack Of Affordable Housing (53).
- Taxes (52).
- Village Center (52).

Overview Of Participants

1. 82% of participants were full-time residents (74% were owners and 8% were renters). 11% owned a second home in Canaan / Falls Village.
2. 30% of participants were from the Village Center area, 30% from areas south of Rt 126 and Rt 63. 21% percent from areas north and west of Rt.7 and 195 from areas east of Route 7 and Route 63.
3. 57% of participants were 20 to 64 years old - 43% were over age 65.
4. Half of participants have lived here less than 20 years – half for longer.
5. 81% of participants indicated they had no children living at home.
6. As to overall quality of life, 71% rated it very good or excellent, 23% rated it good, and 7% rated it fair or poor.
7. 70% of participants felt they would still be living here in 10 years. About 30% felt they might live elsewhere.
Importance / Performance - When asked to rate the “importance” and “performance” of a list of 15 pre-selected POCD topics, the top responses included:

<table>
<thead>
<tr>
<th>Importance</th>
<th>Performance</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Protecting Natural Resource</td>
<td>• Providing Quality Education</td>
</tr>
<tr>
<td>• Preserving Open Space</td>
<td>• Enhancing the Village Center</td>
</tr>
<tr>
<td>• Promoting Agriculture</td>
<td>• Preserving Open Space</td>
</tr>
<tr>
<td>• Improving Facilities / Services</td>
<td>• Protecting Natural Resource</td>
</tr>
<tr>
<td>• Providing Quality Education</td>
<td>• Enhancing Characteristics / Assets</td>
</tr>
<tr>
<td>• Promoting Bus./Eco. Development</td>
<td>• Improving Facilities / Services</td>
</tr>
</tbody>
</table>

Greatest Challenge - When asked an open-ended question about what they see as the greatest challenge or need facing Falls Village in the next 10 to 20 years, the top responses included:

• Affordable Housing / Housing 36
• Younger Population 33
• Taxes / Cost of Living 21
• Growth / Economic Development 19
• Character 16

Make One Thing Happen - When asked about the one thing that could happen to make Falls Village a better place, the top responses included:

• Affordable Housing / Housing 38
• Community / Communication / Discord 22
• Village Center 17
• Facilities / Services 17
• Government 15

Support For Specific Initiatives - When asked about their level of support of certain initiatives which have been discussed in Falls Village in recent years, participants indicated the following levels of support:

• Attracting younger residents and families 91%
• Attracting economic development to generate tax revenue 90%
• Enabling the creation of housing that is more affordable 86%
• Adding new businesses and uses in the Village Center 75%

Board Members Survey

A survey of members of some local boards and commissions early in the planning process revealed some “top of mind” topics to be considered in the POCD.

What do you particularly like about Falls Village and how it has evolved?
• Sense of community.
• Rural / environment.

Is there anything about how Falls Village has evolved that you do not care for?
• Social discord
• Housing debate

What do you see as the greatest challenge ... in the next 10 to 20 years?
• Housing / age composition.
• Agreeing on a common vision.
• Maintaining what we have.
• Generating revenue.

What types of things should Falls Village encourage in the future?
• Housing / younger population.
• Growth / Revenue / Businesses.

What types of things should Falls Village discourage in the future?
• Character change.

If the Plan of Conservation and Development could help make one thing happen in Falls Village in the next 10 years, what would you want that to be?
• Affordable housing / Younger populations.
As was noted in the 2002 POCD, preserving “community character” was a theme that resonated with most participants. The same finding was made as part of preparing this POCD.

However, no common definition of what this term means has been determined. The elements of “character” seemed to be unique to each person. Still, there seem to be some common elements:
- Preserved open space,
- Undeveloped lands,
- Expansive views,
- Quaint village center, and
- other unique resources (such as the Great Falls).

It is specifically recognized as part of this POCD that the concept of character is a planning “construct” intended to capture what residents feel about their community.

This is important because Public Act 21-29 contained specific language prohibiting “character” being applied to deny any zoning application on the basis of a district’s character, unless such character is expressly articulated in such regulations by clear and explicit physical standards for site work and structures.

Since this terminology is sensitive, this POCD tends to use the word “ambience” to refer to the overall concept of community character.

**Community Workshop Meeting**

As part of preparing the POCD, a public workshop meeting was held in the gymnasium at Lee H. Kellogg School to learn about issues that Falls Village residents felt were important to consider in the POCD. People were informed about the meeting through a town-wide mailer, social media posts, press releases, word-of-mouth, and other means. About 70 people attended the meeting.

**Planning Points Exercise** - Attendees at the meeting were given an envelope containing planning points and asked to use those planning points to express their feeling about topics typically considered as part of a POCD. People were given five vouchers representing “planning points” (one @ 20 points, two @ 10 points each, and two @ 5 points each) to allocate among twelve boxes representing topics that might being considered for Falls Village’s POCD. The results are presented below.

<table>

</tbody>
</table>
The remaining portion of the community workshop meeting was devoted to an interactive discussion about the topics which received the most planning points. The key parts of those interactive discussions have been included in the POCD chapters that follow.

**Change Over Time ...**

It is interesting to note how Falls Village’s planning priorities have changed over time. While different categories were used during preparation of the 2002 POCD, the same type of exercise was conducted. The following graphic is intended to illustrate how community priorities may have changed over the past two decades (change in percentage of points received).

| 1. Housing Affordability (+15% = NEW) | 2. Community (+9% = NEW) |
| 3. Sustainability (+6% = NEW) | 4. Village Center (+5%) |
| 5. Utilities (+3%) | 6. Walking / Biking / Other (+3%) |
| 7. Community Facilities (+2%) | 8. Housing and Residential Issues (0%) |
| 9. Community Character (0%) | 10. Transportation / Traffic / Circulation (-2%) |
| 11. Conservation of Natural Resources (-5%) | 12. Economic Development (-7%) |
| 13. Preservation of Historic Resources (-8%) | 14. Open Space (-10%) |
| 15. Land Use Regulations (-11%) |

Town-Wide Mailer
POCD Formulation

From the community engagement process, it was determined that the key issues and strategies in the POCD would include:

- Becoming a more sustainable and resilient community,
- Creating more housing opportunities,
- Increasing the vitality of the Village Center,
- Supporting economic development, and
- Promoting a diverse community.
1.4 Using The POCD

POCD Organization

Based on input from the community and discussion by the Planning and Zoning Commission, the chapters of the POCD are organized around four main themes:

- Each theme contains one or more sub-sections addressing specific topics of importance to Falls Village, and
- Each theme presents goals and strategies (including policies and action steps) for the future of Falls Village.

Address Key Issues

- Become A More Sustainable / Resilient Community
- Create Housing Opportunities
- Increase The Vitality Of The Village Center
- Promote Economic Development
- Promote A Diverse Community

Maintain / Enhance Community Assets

- Protect Natural Resources
- Preserve And Enhance Open Space / Trails
- Encourage Working Lands
- Protect Historic Resources
- Protect Other Community Assets

Address Other Issues

- Support Community Spirit / Civic Participation
- Address Transportation Needs / Issues
- Promote Improvement of Broadband / Wireless
- Consider Naming The Town Falls Village

Implementation

- Implement Policies
- Complete Action Steps

Strategic v Tactical Planning

It is important to note that this Plan of Conservation and Development is a “strategic” plan rather than a “tactical” plan:

- Strategic plans define long-term goals and how to achieve them.
- Tactical plans, on the other hand, are used to implement strategic plans and typically involve more detailed proposals, specific approaches, best practices, resource needs, etc.

Adapted from “Strategy vs. Tactics: The Main Difference & How to Track Both”
www.clearpointstrategy.com
Focus On Implementation

Implementation is the most important part of the planning process and a key focus in this POCD. Several elements of this POCD have been specifically configured to promote implementation:

1. **Policies And Action Steps Specifically Called Out** – The POCD contains two types of strategies – policies and action steps. These are located at the end of each topical section of the POCD.

Policies are statements (in black text) which should be used to evaluate proposed decisions or activities for consistency with the POCD. Policies are somewhat passive and may never be considered implemented since they are intended to be on-going. Policies should be used by:

- The Planning and Zoning Commission to evaluate potential actions (such as zoning amendments, Special Permits, and municipal improvements) in terms of POCD consistency, and
- Other boards and commissions in terms of initiating new programs, preparing local budgets, seeking grant funding, etc.

On the other hand, action steps are specific pro-active tasks (in italic text) which should be taken to implement the POCD. Action steps can be considered implemented when complete.
2. **Leaders / Partners Identified** – Each policy and action step in the POCD has a leader (and often one or more partners) identified. These are the entities most responsible for implementation of that policy or action step. Experience has shown that specifically identifying the responsible entity has a dramatic effect on implementation. The legend for acronyms used to identify leaders and partners is presented below and, for ease of reference, is also presented on the back cover.

**Legend Of Leaders / Partners**

These acronyms are used in the POCD to identify organizations thought likely to be involved in implementing the polices and action steps *(red italic text refers to organizations suggested as part of this POCD)*

2 ADDRESS KEY ISSUES

Sustainability / Resiliency

For the purposes of this Plan, the term "sustainability" refers to the concept of using resources in ways that balance current desires with future needs so that all generations will have what they need.

The term "resiliency" refers to the community’s ability to adapt to new circumstances and/or recover from sudden changes or adversity.

2.1 Become A Sustainable /Resilient Community

In recent years, the concepts of sustainability and resiliency have grown in visibility and importance and, perhaps more importantly, recognition that communities like Falls Village have important roles to play in addressing them. The POCD recommends that Falls Village continue to be aware of and sensitive to promoting a more sustainable and resilient future.

The need for action became especially apparent in Falls Village (and surrounding communities) during July of 2023 when an intense rain event overwhelmed storm drainage facilities and the stormwater runoff eroded drainage channels, undermined roads, flooded roads and properties, and closed a number of local facilities and businesses. Climate change is likely to result in more frequent and intense storms that will affect the community and the residents and properties in Falls Village.

This POCD chapter identifies strategies to:

- Address climate change,
- Promote environmental /ecological sustainability, and
- Promote resilience from impactful events.
Climate Change

Climate change is part of the discussion of sustainability. Climate change has been occurring over time because of the use of “fossil fuels” (energy sequestered over millennia) at a rapid pace and in a way that results in the emission of heat and other negative effects. News sources report that July 2023 was the warmest month in history across the globe. Climate change has resulted in global warming, sea level rise, more frequent and more intense storm events, habitat changes, and other effects.

Strategies to address climate change have to address how people and organizations use energy and this is what makes it so hard. People have become accustomed to how they use energy, and they can be reluctant to change. Yet, if we are to make a difference in addressing climate change, these are the actions that must be taken to address the root causes of climate change. Falls Village is fortunate to have people and organizations (such as Great Mountain Forest) prepared to collaborate on ways to address climate change and resilience.
Environmental /Ecological Sustainability

Energy Conservation / Transition – Reducing energy usage (especially fossil fuel energy usage) by people and organizations (including the Town) will enhance overall sustainability. Falls Village should:

- Help residents, businesses and government accelerate the transition from conventional energy approaches to more sustainable approaches,
- Encourage residents and businesses to find ways to reduce energy consumption (more efficient equipment, better insulated buildings, a transition from oil to heat pumps, solar, and other approaches),
- Seek to acquire one third (or more) of the town’s energy through renewable sources by 2030,
- Promote the installation of solar arrays on residential, commercial, institutional, and town buildings, and
- Install more electric vehicle charging stations in Falls Village.

Energy Approaches

Falls Village is considering ways to diversify energy sources and this has included looking at the use of solar arrays when and where appropriate.

Water Conservation – There has been a growing awareness for many years about the need for water conservation and Falls Village should promote water conservation in the community. Even though many residents get their water from private wells, such sources are reliant on groundwater and the state recently experienced a drought and water restrictions were established in a number of communities.

Waste Reduction / Recycling – Falls Village should continue to encourage reducing the amount of trash entering the waste stream and promoting reduction, composting and recycling.

Sustainability Education – Educational efforts will help Falls Village residents and businesses become more sustainable. Falls Village should continue educating residents about sustainability concepts and how to be as sustainable as possible.
Resiliency

As the world continues to change in ways that we cannot fully envision today (climate change, severe storms, health pandemics, economic upheavals etc.), it is important Falls Village seek to become an even more resilient community in order to be able to adapt to new challenges and opportunities. Falls Village should continue to identify possible hazards so preparation (and mitigation, if possible) can be made beforehand.

In terms of natural hazards, Falls Village continues to participate in the preparation of a regional hazard mitigation plan (NHCOG) and is implementing various recommendations intended to reduce risks and promote recovery.

A. POLICIES

1. Seek to reduce energy consumption (facilities, vehicles and equipment) by becoming more energy efficient, acquiring energy through renewable sources (solar, wind, etc.) and other means.
2. Reduce greenhouse gas emissions and implement strategies that will address the root causes of climate change.
3. Inform and educate residents, businesses and government on addressing climate change, energy conservation, energy micro-grids, water conservation, waste reduction, and other sustainability topics.
4. Promote recycling through town publications and coordination with waste haulers.
5. Become an even more resilient community in order to adapt to new challenges (climate change, severe storms, health pandemics, economic upheavals etc.).
6. Promote the responsible deployment of solar energy (rooftop, canopy ground mount, larger scale) including a public discussion of land appropriate for solar development.
7. Participate with regional agencies on updating and refining “hazard mitigation” strategies and climate adaptation strategies.
8. Continue to participate in programs offered by SustainableCT.

B. ACTION STEPS

1. Establish a Sustainability Committee to help guide Falls Village towards becoming a more sustainable / resilient community.
2. Update Zoning Regulations to address private solar arrays (attached and free-standing) and wind energy systems.

Information from www.adaptationclearinghouse.org indicates that small communities and rural areas face unique climate adaptation / sustainability / resilience challenges due to:

- Limited administrative capacity within government,
- Less diversified economies,
- More dependence on natural resources, and
- Greater physical isolation from critical infrastructure and services.

There are numerous sources of information on how to start addressing these issues.

Overall, coordinating with the Northwest Hills Council of Governments and adjacent communities will be very helpful in overcoming some of the challenges that can face small communities.
2.2 Create More Housing Opportunities

Falls Village is primarily a residential community and the vast majority of the land in Falls Village is zoned residential. However, due to number of factors such as a lack of housing production in northwestern Connecticut and elsewhere, interest in seasonal homes, expansion of AirBnB and other short-term rentals, the price of housing has outpaced median income growth and so housing has become less affordable over time.

This mismatch between housing prices and what people can afford to spend on housing affects existing residents as well as people seeking to live in the community on a full-time basis.

In a number of exercises conducted as part of preparing this POCD, the lack of housing that is affordable to an older population, to young persons and families just starting out, and to people earning typical wages was identified as a key issue for Falls Village for a number of reasons:

- Affordable housing brings in younger people and families that help energize and refresh our community with new ideas,
- Affordable housing lets seniors (who may be living on fixed incomes) stay in the community where they may have lived for decades, and
- Affordable housing supports so many elements of our community:
  - Volunteer organizations.
  - Workers at local businesses.

Some people can afford housing at median prices and above but a significant part of the population may not be able to afford it now or in the future.

This is why Falls Village has chosen to make housing a priority in this Plan of Conservation and Development and the recently adopted Affordable Housing Plan.
This change in focus and increase in emphasis compared to previous Plans of Conservation and Development is deliberate and is intended to enable and encourage housing options so that Falls Village’s housing portfolio can adapt to meet changing needs. The overall intent is to address identified housing needs for:

- An aging population, and
- Low- and moderate-income persons and families.

The POCD supports efforts which will help provide affordable housing options for those who need it today or may need it at some time in the future.

**Support Services**

While some households will benefit from the establishment of additional affordable housing units, there are other households in Falls Village who have housing already but need additional services and support. Instead of waiting until additional affordable housing units are added in Falls Village, the Town should investigate the feasibility of increasing support services for lower income residents through a full-time town social worker, partnerships with other entities (such as Chore Service, and other services).

**Proposed Affordable Housing Development In Falls Village**

**Terminology**

The term “affordable housing” is used by government agencies to describe housing which is affordable to people earning 80% or less of area median income because they do not have to spend more than 30% of their income to obtain it.

However, as part of the process of preparing this POCD for Falls Village, it was learned that the term “affordable housing” does not resonate with people and often brings up pre-conceived notions which do not reflect what is being considered or contemplated.

The POCD recommends that Falls Village (and other entities) continue to work on better terminology and/or ways to better inform people about what affordable housing actually is.

**Housing Activities**

In recent years, the Falls Village Housing Trust (a private non-profit corporation) has been working on creating affordable housing units:

- In a new development on River Road, and
- On individual properties in the Village Center area.

### Feasibility Studies

This section of the POCD recommends three feasibility studies – all of which are related to seeing if there are town, state, or utility properties that might be used to create more housing opportunities in Falls Village.

While the feasibility studies are listed separately, these studies could be undertaken in some combination in order to find opportunities to create more housing opportunities.
2.3 Increase The Vitality Of The Village Center

For many years, residents have identified the Village Center as an important focal point of the community. However, people want the Village Center to be more than it is today in terms of its overall vitality. Over the last several decades, there have been improvements in the overall streetscape of the Village Center (sidewalks, planters, benches, crosswalk, etc.) but overall vitality will come from more residents and businesses in the Village Center area.

Over the next 10 years, efforts should be devoted to promoting, encouraging, and supporting residential and business development in the Village Center area. The Village Center is a great location for:

- More residential units (especially small multi-family residential buildings to help create more housing opportunities), and
- More business uses to attract even more people to the Village Center.

It is important to note that the existing Village Center has residential homes and residents which have been there for years. Any proposed development or proposed special events in the Village Center should find ways to balance community interests (such as increasing vitality, addressing housing needs, or promoting economic development) with a desire to ensure that the special character of the Village Center area is retained, and that such activities are sensitive to existing residents and property owners.

A challenge to existing properties, new development and enhancing Village Center vitality may be accommodating septic systems on small lots. A limited common sewerage service in the Village Center area (which might collect sewage from different properties and convey it to a common leach field) could help address current issues and facilitate new development. In essence, the lack of capacity for sewage treatment limits the utility of some properties in the Village Center and constrains the ability of the Village Center to meet community needs and desires. During the planning period, the potential benefits of some sort of limited common sewerage system in the Village Center should be investigated. Once the costs and benefits of such a system are better understood, the community can discuss various options and decide whether to implement such a program in the Village Center to find common solutions.

In addition:

- Re-use of historic structures in the Village Center and the construction of new buildings that reflect the existing ambience will be important.
- Expanding and improving the sidewalk network should be a goal.
- Over time, as opportunities present themselves, wired utilities should be placed underground.
- Special events and other activities (and signage and advertising) are strongly encouraged to help bring more people and businesses to the Village Center.
Generalized Extent Of Village Center

Pink color represents locations zoned Village Business.

(note that zoning districts might be amended over time so please check with Town Hall)
Concept For Possible Parking Expansion On Railroad Street

Falls Village Inn

Iconic Caboose

Main Street

David M. Hunt Library
### A. POLICIES

1. Reinforce the Village Center as the business, institutional, historic, and cultural center of the town and a major community focal point.  
   - **All**
2. Work on ways to increase businesses and visitors to the Village Center including more businesses, parking, events, activities, marketing, advertising, special events, signage, wayfinding, etc.  
   - **All**
3. Encourage mixed-use buildings in the Village Center.  
   - **P&Z**
4. Encourage or require new buildings to be compatible in scale and materials with neighboring buildings in the Village Center.  
   - **P&Z**
5. Undertake programs to support a dynamic Village Center with the appropriate use of historic buildings as the centerpiece of these efforts.  
   - **All**
6. Continue to improve the village streetscape by expanding sidewalks and integrating parking, landscaping, and buildings into a cohesive overall plan.  
   - **All**
7. Over the long term, seek to put wired utilities underground in the Village Center.  
   - **BOS**

### B. ACTION STEPS

1. Continue to investigate the feasibility of a common sewerage system in the village area.  
   - **BOS**
2. Consider expanding the Village Business Zone to enable creative development and opportunities for more small businesses.  
   - **P&Z**
3. Apply to CT DEEP for a wastewater planning grant to determine possible wastewater management solutions and costs.  
   - **BOS**
4. Investigate the feasibility of relocating the Public Works facility so that the site could be devoted to uses which will enhance the vitality of the Village Center.  
   - **BOS**  
   - **P&Z**
5. Explore using Town-owned properties in the Village Center to support revitalization of the Village.  
   - **BOS**
6. Consider designating the Village Business zone as a “village district” under CGS Section 8-2j to have the ability to consider aesthetics as part of application reviews.  
   - **P&Z**
7. Consider designating some or all of the Village Residential zone as a “local historic district” under CGS Section 7-147c so that a local Historic District Commission could be established and have the ability to issue “certificates of appropriateness” for exterior architectural features visible from a public street, way or place.  
   - **BOS**
8. Evaluate a “special event” approval process to ensure key issues are considered and appropriate guidance is in place.  
   - **BOS**

### Trees And Vegetation

The trees lining the streets and sidewalk of Falls Village are an essential part of the “village atmosphere” yet the trees need to be maintained and cared for vigilantly.

Maintenance of planted areas (weeding, maintenance, removal of weeds growing next to the curbs throughout town) is labor-intensive.

The POCD supports public-private partnerships to help maintain and enhance the trees and the maintenance of planted areas in the Village Center.
2.4  Promote Economic Development

Economic development is important to Falls Village because it will contribute tax revenue to support local services, supply goods and services to meet local needs, and provide jobs for residents.

In a small town, it can be challenging to be able to devote adequate resources (like money and people) to economic development to make measurable progress. In recent years however, the Board of Selectmen was able to muster a modest stipend to have an Economic Development Director to:

- Seek grant funding to support community objectives,
- Cultivate relationships with other organizations, and
- Improve economic conditions and overall quality of life in Falls Village.

Additional economic development initiatives important to Falls Village include:

- Supporting home-based businesses (roughly one quarter of all households in Falls Village reported some self-employment income),
- Seeking to avoid strip development patterns (automobile-oriented commercial development along roadway corridors),
- Jobs to support people and families who already live nearby and attract more people and families,
- Enhancing the overall vibrancy of the community, and
- Alleviating the tax impact resulting from fewer residents supporting the overall municipal infrastructure.

The Northwest Connecticut Economic Development Collaborative and the Falls Village Community Development Corporation (a private, non-profit organization) can support and complement these efforts.
A. POLICIES

1. Pursue development, uses, and activities that will:
   - provide jobs,
   - provide goods and services,
   - provide net tax revenue to support local services, and
   - be compatible with Falls Village’s vision.
   - All
   - P&Z

2. Maintain the tax abatement policy as an incentive for existing and new businesses to invest in Falls Village (a temporary reduction of taxes in exchange for a capital investment in a local facility).
   - BOS
   - BOF

3. Guide economic development in ways to best strike a balance with the desire to maintain the ambience and character of Falls Village.
   - BOS
   - P&Z

B. ACTION STEPS

1. Review the Zoning Regulations to see if there are any impediments to economic development which could be ameliorated.
   - P&Z

2. Review the Zoning Regulation provisions for the Rural Business and Light Industrial zones to ensure they are in harmony with the overall vision of the POCD.
   - P&Z

3. Review the home-based business regulations.
   - P&Z

4. Explore using a “planned development district” regulation as a tool to enable creative economic development.
   - P&Z

5. Explore using Town-owned properties to support economic development in Falls Village.
   - BOS

6. Work with the Historical Society on aesthetically pleasing entry signage to the Village Center.
   - BOS
   - P&Z

Using Town Property

As recommended in Action Step #5 on this page, the Town issued a “request for proposals” for the sale of the Old Firehouse on Railroad Street.

This approach, and future ones like it, are intended to attract potential buyers whose business or other activity will help increase the vitality of the Village Center, enhance the local economy, and have a “multiplier” effect on existing businesses.

Planned Development District

A “planned development district” is a zoning district where the requirements for the zone would be the site-specific plan approved by the Planning & Zoning Commission. This type of “planned zone is authorized by CGS Section 8-2(c)(8).

This type of approach offers maximum flexibility in allowing and regulating a specific development proposal.

Since the Planning & Zoning Commission has considerable discretion when it acts in a legislative capacity (such as for zone changes and regulation changes), reviewing and approving the actual site plan is much more definitive than reviewing words or numbers.

This approach gives the Planning & Zoning Commission significantly more control over an application than either a Special Permit or a Site Plan application.
2.5 Promote A Diverse Community

Falls Village has a very strong sense of community and an evident sense of community spirit. As was stated by a resident in a community meeting: “The overall sense of community and connections within the community are critical to our character and to our future. These are the things that hold us together.” While people can feel anonymous or unconnected in larger communities, people in Falls Village feel connected to, and responsible for, their community. Residents love Falls Village and want to share it with others.

Residents want Falls Village to be a diverse community with residents of all ages — old, young and in between. Attracting a younger population was mentioned several times during the planning process. Residents commented that they would like to do more to attract more young people and families in order to support the school, replenish the supply of volunteers, and continue to invigorate the community with new initiatives and ideas. Other strategies of the POCD support this initiative (affordable housing, economic development, broadband infrastructure, etc.).

Falls Village also would like to attract people from a variety of backgrounds and cultures with a diverse array of interests and avocations. While the concepts of diversity, equity, and inclusion (see sidebar) have been recently adopted in other communities, Falls Village feels that it has always embraced them.

As part of the process of preparing this POCD, Falls Villager residents indicated they want to continue this tradition of diversity, equity, and inclusion and invest in keeping people connected in the future.

Diverse Community

**Diversity** - the presence and celebration of variety (such as in gender, race, age, identity, or opinion) within the community.

**Equity** – the establishment and maintenance of fairness and justice within the community so that all people are treated equally, especially for groups that have historically been disadvantaged.

**Inclusion** – creation of a culture and an environment that results in a sense of opportunity for all and a sense of belonging where all people feel their voices are heard.

---

Children’s Theater  Younger Residents
### A. POLICIES

1. Help Falls Village be a community with residents of all ages — old, young and in between — and seek to attract more younger people and families in order to support the school, replenish the supply of volunteers, and continue to invigorate the community with new initiatives and ideas:
   - Provide for more affordable housing.
   - Provide for more economic opportunities.
   - Improve broadband / fiber optic capacity to better support an entrepreneurial / creative economy.

2. Increase diversity, equity, and inclusion in Falls Village.

### B. ACTION STEPS

1. Promote Falls Village’s many assets and help encourage more young people and families to live here.

---

**Kellogg School Artwork**

As part of the process of preparing this POCD, the students at Kellogg School were asked to create pictures of things they really liked about Falls Village today or might want to see in Falls Village in the future. Some of the artwork created is shown on this page.
3.1 Protect Natural Resources

Residents understand that natural resources are important to the overall ecological balance in Falls Village and want to preserve those resources:

- Watercourses, waterbodies, wetlands, and floodplains,
- Water supply watersheds, areas of high groundwater availability, and identified aquifers and recharge areas,
- Unique or special habitat areas, and
- Steep slopes.

The most important natural resources in Falls Village are water related. The Housatonic River and the Great Falls are significant resources. Robbins Swamp is the largest calcareous swamp in the state. Wangum Lake is a water supply reservoir for Norfolk. The Hollenbeck River is a unique resource in the community. Groundwater is the water supply source for all Falls Village residents.

Falls Village is fortunate in that the 1,800 acres of Great Mountain Forest within the municipality will protect natural resources by virtue of being protected under the working forest conservation easement of the Forest Legacy Program.

A. POLICIES

<table>
<thead>
<tr>
<th></th>
<th>Leader / Partners</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Continue to protect watercourses, waterbodies, wetlands, floodplains, vernal pools, and other important water resources.</td>

<tr>
<td>1.</td>
<td>Update stormwater and erosion control regulations, including low impact development techniques.</td>
</tr>
<tr>
<td>2.</td>
<td>Modify local regulations to require DEEP notification when development sites are within areas shown on the Natural Diversity Database map.</td>
</tr>
</tbody>
</table>
3.2 Preserve And Enhance Open Space / Trails

The Plan defines open space as land that is permanently preserved as open space through ownership, deed restriction, or other means. Falls Village is fortunate to have a lot of preserved open space that makes the community unique and helps establish the overall community ambience that people find attractive.

With the significant amount of open space in Falls Village, the community has an opportunity to establish and promote a greenway trail system. The development of a system of trails will help enhance community ambience and quality of life. It is also a way to attract visitors to Falls Village and support some of the economic development goals of the POCD.

A. POLICIES

1. Recognize that interconnected open spaces help protect natural resources, contribute to community ambience, and make Falls Village unique. **All**

2. Seek to identify existing (and establish new) walking/hiking trails in open space areas in Falls Village to provide recreation and tourism benefits. **RC**

B. ACTION STEPS

1. Prepare informational materials on the availability of open space trails in Falls Village in order to better publicize these amenities and capitalize on any economic opportunities. **RC**
3.3 **Encourage Working Lands**

Falls Village has a strong history of a resource-based economy and farms, farming, and forestry continue to contribute to provide a living to residents and workers, provide goods and services to the region, and contribute to overall ambiance of the community. Falls Village should continue to encourage such uses.

### A. POLICIES

<table>
<thead>
<tr>
<th>Leader / Partners</th>
<th>1. Continue to encourage farms, farming, and agricultural and forestry operations.</th>
<th>All</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>2. Support educational programming (such as at Great Mountain Forest and VoAG program at HVRHS) that will support current and future agriculture.</td>
<td>All</td>
</tr>
<tr>

<td>2. Investigate additional ways to enhance and promote the viability of local farms, farming and farm businesses.</td>
<td>Town</td>
</tr>
</tbody>
</table>

---

**Working Lands**

Great Mountain Forest (a 6,000-acre non-profit preserve that straddles Falls Village and Norfolk) is one example of working lands.

The Great Mountain Forest mission statement is:

*Great Mountain Forest’s mission is to be a leader in forest stewardship. We practice sustainable forest management, promote biodiversity and resilience to climate change, support education and research, and welcome all who love the woods.*

As part of their mission, Great Mountain Forest has indicated they will continue programming lectures and outreach opportunities on forest stewardship (including educational offerings from Great Mountain Forest to both Kellogg School and Housatonic Valley Regional High School).
3.4 Protect Historic Resources

Falls Village has several recognized historic resources and most of the Village Center area is nationally recognized for its historic attributes.

A. POLICIES

1. Encourage preservation of historical and archaeological resources. All
2. Support educational programming that promotes awareness of historical and cultural resources. FVHS Library
3. Encourage the nomination of eligible resources to the National or State Register of Historic Places. FVHS
4. Consider establishing a Historic Advisory Committee. BOS

B. ACTION STEPS

1. Adopt a demolition delay ordinance to allow time for the documentation and preservation of historical structures. BOS
2. Investigate establishment of a “local historic district” in accordance with CGS Section 7-147c. BOS HAC
3. Encourage educational activities of the Falls Village Historical Society. All

3.5 Protect Other Community Assets

Protecting and preserving other features which contribute to the overall appearance, ambience, and sense of place in Falls Village will also be important.

A. POLICIES

1. Seek to preserve the scenic aspects of local roadways. All
2. Encourage the Department of Transportation to designate State highways in Falls Village as scenic highways (CGS Section 13b-31). BOS
3. Carefully evaluate proposed siting of telecommunications towers and other facilities to mitigate environmental and scenic impacts. All
4. Support non-profit organizations that enrich the local quality of life. All

B. ACTION STEPS

1. None at this time
4.**ADDRESS OTHER ISSUES**

4.1 **Address Community Facility Needs**

The term “community facilities” refers to buildings and sites used to provide community services and this includes the Town Hall, schools, firehouse, public works garage, recreation facilities, library, etc. The POCD looks at these facilities to ensure they are capable of addressing community now and in the future.

Some of these facilities are not owned, managed, or operated by the Town.

<table>
<thead>
<tr>
<th><strong>A. POLICIES</strong></th>

<td>RC</td>
</tr>
<tr>
<td>3. Continue to work on prioritizing infrastructure needs for town buildings, roads and bridges.</td>
<td>BOS</td>
</tr>
</tbody>
</table>
4.2 Support Community Spirit And Civic Participation

Community spirit (pride in one’s community) is an important part of people’s perception of their quality of life. While community spirit is generally high in Falls Village, several observations were made in the on-line survey and community meetings about a number of instances involving lack of civility in public discourse. Falls Village should seek ways to address this so that residents do not become fearful of public meetings and discussions.

In addition, Falls Village also needs to encourage a culture of volunteerism so that people can be engaged in the issues important to the community.

A. POLICIES

<p>| | | |</p>
<table>

Memorial Day Parade
4.3 Address Transportation Needs / Issues

Falls Village has a road system which evolved over centuries to meet the needs of the community. It is anticipated that the current road network will be adequate for community needs for the foreseeable future.

The POCD supports:
- Continuing to maintain the safety and condition of local roads.
- Addressing three locations on State highways with possible operational issues due to the configuration of the roadway intersections:
  - The Route 7 at Route 126 intersection (sight lines), and
  - The Route 7 at Route 63 intersection (sightline NB).
  - The Route 63 at Route 126 intersection.
- Continuing to support regional dial-a-ride services for people in Falls Village who need it (currently limited to medical appointments).
- Upgrading the rail line tracks to handle existing freight traffic and, at some point, passenger service.

<table>

4.4 Promote Improvement Of Broadband / Wireless Capacity

In this day and age, electronic communications have overtaken the roles once played by seaports, railroad stations, electricity services, roadway systems, and wired telephones. As a result, the accessibility, speed and capacity of broadband (fiber) and wireless services available to local residents and businesses is of significant importance both economically and socially. This may be especially true in Falls Village since about one-quarter of all residents have some self-employment income.

Broadband has become especially important in the age of remote work, remote schooling, remote meetings, and other functions.

4.5 Consider Naming the Town Falls Village

While it is certainly not the most important recommendation of this POCD, the idea of changing the name of the Town from Canaan to Falls Village has been raised by a number of residents over many years. In a telephone survey about 25 years ago, more than seven of ten residents favored changing the town name. The process of changing the name of a town will require an act of the Legislature.

Name Confusion

Local residents are practically forced to refer to their community as Falls Village to avoid confusion with the village of Canaan. When the name Canaan is used, most people in Connecticut think of the village of Canaan in the Town of North Canaan (rather than the Town of Canaan) since the village:
- Is more populated,
- Is at the junction of two major roads (Route 44 and Route 7), and
- Has the postal address of Canaan.

This causes confusion in many different ways. For example, births recorded to mothers who reside in the village of Canaan (in North Canaan) are often credited to the Town of Canaan. As a result, the birth rate for the Town of Canaan is reported to be about 2.5 times higher than the state average while the birth rate for the Town of North Canaan is reported to be less than one-third of the state average.

If Census data from Falls Village is incorrectly attributed to North Canaan, Falls Village may get short-changed for state and federal funds which it is otherwise entitled to (and are needed locally).

A. POLICIES

1. Continue to clarify that Falls Village is its own community, not part of a separate municipality. All

B. ACTION STEPS

1. Conduct a non-binding referendum on the name change issue. BOS
2. If residents favor the name change, consider asking legislators to sponsor the necessary legislation. BOS
5 IMPLEMENTATION

5.1 Implement The POCD

Implementation of strategies is the most important part of the POCD process. Implementation takes place when:

- POCD policies are applied during decision-making processes, and
- POCD action steps are completed.

As a result, the POCD has been set up to promote implementation in a couple of ways. First, the POCD distinguishes between policies and actions steps:

- Policies are statements used to guide decisions. Typically, policies are ongoing, do not lend themselves to being categorized as implemented, and do not lend themselves to target completion dates.
- Action steps (italic text) are specific pro-active actions or tasks which will help accomplish a desired outcome. Since action steps are discrete tasks, their implementation can typically be prioritized, scheduled, measured, monitored, completed, and evaluated.

Second, each policy and action step in the POCD has a leader and some have partners. These are the entities most responsible for advocating for the policy / action step and/or for implementation of that policy or action step. A legend (on the back cover) is used to explain the acronyms used.

The Planning and Zoning Commission (P&Z) has at least three roles in POCD implementation:

- Applying relevant POCD policies to P&Z decisions.
- Initiating and completing the action steps assigned to the P&Z.
- Encouraging other leaders and partners to apply POCD policies and complete action steps in order to accomplish POCD objectives.

The P&Z anticipates that it will, on a regular basis, schedule round table meetings with other town boards and agencies and with other organizations to promote POCD implementation. Such meetings (perhaps 1-2 per year) will provide opportunities to coordinate implementation efforts and find ways to partner to accomplish key priorities.

Of course, implementation will be greatly enhanced by assistance from Falls Village residents and officials. Having a pro-active process to engage the community in helping implement the POCD will help ensure it is influential in guiding future actions of the town.
A. POLICIES

1. Apply the policies of the POCD when reviewing land use applications such as Special Permits, text amendments, or zoning map changes.  

2. Maintain / enhance communication and collaboration between local officials and boards / commissions to help implement the POCD.  

3. Use the POCD to review and comment on municipal improvements as required by CGS Section 8-24.  

4. Use the POCD when preparing operating and capital budgets.  

5. Apply the policies of the POCD when reviewing proposals or strategies.  

6. Complete the action steps identified in the POCD.  

7. Maintain memberships in regional organizations which can help Falls Village provide important services and accomplish its goals:  
   - Regional High School (and similar regional education programs).  
   - Torrington Area Health District.  
   - Northwest Connecticut Transit District.  
   - Northwest Hills Council of Governments.  
   - Northwest Connecticut Conservation District.  
   - Litchfield County Center For Housing Opportunity  
   - Housatonic Valley Association.

B. ACTION STEPS

1. Establish a POCD Action Subcommittee (with a designated representative/liaison from relevant other boards and commissions) or other plan implementation process to help implement the POCD and coordinate efforts.  

2. Obtain funding to implement policies and complete action steps.  

3. Retain a grant writer / special projects coordinator to help support implementation of POCD strategies.  

4. Annually review (and report on) the progress of implementing POCD sections, policies, and action steps.  

5. Update the Zoning Regulations to incorporate POCD recommendations.  

6. Update the Zoning Map and coordinate with the Assessor database.  

7. Incorporate education / training into the annual work programs of local boards and commissions.  

Education / Training

Having local board members attend education and training sessions as part of their annual work programs can provide significant benefits to Falls Village. Since Falls Village is a small town, having commissioners who are up to date on best practices, grant opportunities, and professional contacts can reap great dividends for the community.

Since 2022, land use commissioners have been required to get four hours of training per year and the flow of information has been helpful.

There are a number of State agencies and non-profit organizations that provide training opportunities (both in-person and on-line) and all Falls Village boards and commissions should take advantage of these opportunities for the communities overall benefit.
The 2024-2034 POCD has been prepared to help Falls Village address the opportunities and challenges it may face in the future. It is meant to serve as a guide for enhancing the town’s character, ambience, economy, and quality of life. During the next decade or so, it is envisioned that policies and action steps in the POCD will be implemented as opportunities arise.

In accordance with Section 8-23 of the Connecticut General Statutes, the POCD has been evaluated for consistency and found to be generally consistent with:

- the 2017-27 Regional Plan of Conservation and Development prepared by the Northwest Hills Council of Governments (NHCOG).
**Consistency With State Growth Principles**

In accordance with Section 8-23 of the Connecticut General Statutes, the Falls Village POCD was found to be consistent with statewide growth management principles.

<table>
<thead>
<tr>
<th>Principle</th>
<th>Findings</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Redevelop and revitalize regional centers and areas of mixed land uses with existing or planned physical infrastructure.</td>
<td><strong>CONSISTENT</strong> – Although Falls Village is not a regional center, the POCD promotes mixed use, pedestrian-friendly development in the Village Center.</td>
</tr>
<tr>
<td>2. Expand housing opportunities and design choices to accommodate a variety of household types and needs.</td>
<td><strong>CONSISTENT</strong> - The POCD promotes strategies to help provide for housing options that are more affordable and to address the housing needs of an aging population.</td>
</tr>
<tr>
<td>3. Concentrate development around transportation nodes and along major transportation corridors to support the viability of transportation options and land reuse.</td>
<td><strong>CONSISTENT</strong> - The POCD promotes mixed use, pedestrian-friendly development in the Village Center.</td>
</tr>
<tr>
<td>4. Conserve and restore the natural environment, cultural and historical resources, and traditional rural lands.</td>
<td><strong>CONSISTENT</strong> - The POCD contains specific strategies to: &lt;ul&gt; &lt;li&gt;Promote sustainability / resiliency,&lt;/li&gt; &lt;li&gt;Protect natural resources,&lt;/li&gt; &lt;li&gt;Preserve open space, and&lt;/li&gt; &lt;li&gt;Protect historic and scenic resources.&lt;/li&gt; &lt;/ul&gt;</td>
</tr>
<tr>
<td>5. Protect environmental assets critical to public health and safety.</td>
<td><strong>CONSISTENT</strong> - The POCD contains recommendations to protect water quality (both surface and ground), preserve floodplain areas, minimize runoff, and other similar strategies.</td>
</tr>
<tr>
<td>6. Integrate planning across all levels of government to address issues on a local, regional, and statewide basis.</td>
<td><strong>CONSISTENT</strong> - The POCD has been used, and will be used, to coordinate efforts with: &lt;ul&gt; &lt;li&gt;Adjacent communities,&lt;/li&gt; &lt;li&gt;Regional organizations, and&lt;/li&gt; &lt;li&gt;State agencies.&lt;/li&gt; &lt;/ul&gt;</td>
</tr>

**Been to Canaan**  
Carole King

Green fields and rolling hills  
Room enough to do what we will  
Sweet dreams of yestertime  
Are running through my mind  
Of a place I left behind

Been so long, I can't remember when  
I've been to Canaan  
And I want to go back again  
Been so long, I'm living 'til then  
'Cause I've been to Canaan and I  
I won't rest until, I go back again

Though I'm content with myself  
Sometimes I long to be somewhere else  
I try to do what I can  
But with our day-to-day demands  
We all need a promised land

And it's been so long, I can't remember when  
I've been to Canaan  
And I want to go back again  
Been so long, I'm living 'til then  
'Cause I've been to Canaan and I  
I won't rest until I go back again

Oh, I wanna be there  
In the wintertime  
With a fireplace burning to warm me  
And you to hold me when it's stormy

Been so long, I can't remember when  
But I've been to Canaan  
And I wanna go back again

Been so long, I'm living 'til then  
I've been to Canaan and I  
I won't rest until I go back again

I've been to Canaan and I  
I won't rest until I go back again

**According to Wikipedia:**

"Been to Canaan" is a song written by Carole King introduced on King's 1972 album release, *Rhymes & Reasons*.

Released as that album's lead single, "Been to Canaan" peaked at number 24 on the *Billboard* Hot 100 in January 1973 and it was the second of King's four number one hits on the Easy Listening chart. The single also reached number 20 on the Cashbox chart.

**Local Connection**

From the mid-1960s to 1982, Carole King lived in a house on Music Mountain Road in Falls Village, CT.

The “official name” of Falls Village is Canaan and that is the Canaan referred to in the song.

- Green fields and rolling hills
- Room enough to do what we will
- Be there in the wintertime

**Area Of Music Mountain Road**
LEGEND OF LEADERS / PARTNERS

These acronyms are used in the POCD to identify organizations thought likely to be involved in implementation of the polices and action steps. (red italic text refers to organizations suggested as part of this POCD)
