Precautionary Boil Water Advisory for the following
Customers of the Falls Village System:

**ONLY the following Customer addresses in the Falls Village
System will be affected.**

**33 to 84 Railroad Street
100 to 107 Main Street
35 Water Street
12 Warren Turnpike**

Tuesday 5/26/2026

This is an important message from Aquarion Water Company on Tuesday, May 26, 2026. Aquarion shut down water service in a small portion of the main on Railroad Street to repair a main break, the customers listed above in the Falls Village System will experience a temporary period of no water. With a lack of water pressure, there is a possibility of contamination of drinking water.

In situations like this, the Department of Public Health recommends – as a precaution – that customers boil their water before consuming it or use bottled water until it is confirmed that the water is safe to drink. This precautionary advisory will remain in effect until further notice. After normal pressure is restored, water samples will be collected from the Falls Village System in Canaan, with results expected 24 to 48 hours later.

If you have questions, please contact Aquarion at 1-800-732-9678.

Thank you for your cooperation.
