

An Evening on Fossils

April 7th, 2026 7pm

Durham Community Center

Join the Coginchaug Outdoor Enrichment Center for An Evening on Fossils, as we welcome a new specimen to our collection. A natural cast of our state fossil, a *Eubrontes* track, was found recently in town, donated to the Town of Durham, and given a home in our collection. After the introduction of this fossil, local expert Bob Reynolds will give a presentation on A Timeline of Life on Earth Using Fossils.

This event is free and open to all ages, but we ask that those under 16 please bring a responsible adult. This event is put on by the Coginchaug Outdoor Enrichment Center and Durham Recreation. Please register on Durham RecDesk.
