

IMPERVIOUS COVERAGE CALCULATION WORKSHEET

Permit Number: _____ Address: _____

Impervious Surface: A surface that does not permit the absorption of fluids. As a land use term, impervious surface means any surface such as roads, rooftops, patios, or parking lots that does not allow water to soak into the ground. Impervious surfaces result in runoff from the surface in greater quantities and/or an increased rate when compared to natural conditions prior to development. Examples include building footprint(s), paved driveways, impervious decks, and swimming pools.

Select one of the following Zoning Districts:

_____ R-10 (Max Impervious Coverage 45%)

_____ GR-1 (Max Impervious Coverage 45%)

_____ R-7.5 (Max Impervious Coverage 55%)

_____ GR-2 (Max Impervious Coverage 65%)

_____ RPH-6 (Max Impervious Coverage 80%)

_____ APT (Max Impervious Coverage 65%)

List of Impervious Items	Square Feet
Building(s)	
Driveway(s)	
Walkway(s)	
Pool	
Deck(s)	
Shed(s)	
Patio / Lanai
