Join Zoom Meeting <https://us02web.zoom.us/j/84584897637> Meeting ID: 845 8489 7637

Call to order at 7:02 by Mark Harris

1. Approval of Minutes for June 10, 2025, by Marty Harris, 2nd Simon Ellis and approved
2. Individual lake reports on lake activities

A. Woodridge: Had their Harvester fixed. Working great. Curley leaf reduced but milfoil up. The treatment permit was submitted but not expected to be able to treat until next year. Weed out to depths of 12 feet possibly due to increase in water quality.

B. Dog Pond: No treatment until after camp ends. Plan on Hydro-raking north end to remove mor biomass. Will have pretreatment survey done but know water chestnut are back. Curley leaf is now in Dog Pond. A study shows that Hydrilla has shown up in water ways after bass tournament. Percellcor. Their treatment permit is still active for additional treatment.

C. West Side: They have completed 2 treatments and seems effective for Variable Milfoil. One more treatment is due for this year. Additional permitted treatments will have to be delayed. Money is always a problem.

D. Tyler Lake: First application done on June 30th. Two more treatments are due in July and August. The northern cove has been invaded with Milfoil, but we are restricted from treating closer than 300 feet because of endangered species.

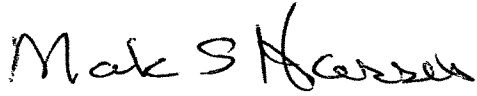

Adjournment at 7:22 by motion by Simon, 2nd by Michele and Approved.

Members present: Michele Fitzpatrick, Marty Harris, Joe Welsh, Lida Exstein, Chris Kennavane and Simon Ellis.

Respectfully Submitted,

Mark S Harris

Chairman

By: Mark S Harris, Chairman
