Members attending: Chairman Jerry Geci, Helen Simko, Chez Lilley, Dave Wilson
Also attending: First Selectwoman Denise Raap and Public Works liaison Naomi Boccio.

Chairman Geci called the meeting to order at 4:07 p.m.

After stating that the purpose of this special meeting was to discuss the problem of trash in the center of town and to assist the Borough and HDC in selecting and locating new trash and recycling containers and to recommend a solution to the problem of dog waste, Geci gave a brief history of the attempts by the recycling committee to deal with trash disposal and recycling in the center of town.

A discussion ensued about the type of containers that would be appropriate to the town center to replace the bins now in use. The consensus was to recommend three Barco Company Double Receptacles with double steel lids with two 32-gallon plastic liners to be placed (1) at the post office; (2) just off the sidewalk between the visitors’ booth and the cross walk into town; (3) curbside in the vicinity of F. North Clark.

In addition, with the convenience of visitors to town in mind the task force members recommend a Mutt Mitt dog waste station with receptacle be placed at a location behind the visitors’ center on the green or maybe one to the left of the Post Office building and another somewhere below the Murphy pharmacy.

The members also discussed the possibility of recommending a cigarette smoker’s receptacle but decided to leave that decision to the borough.

Raap and/or Geci will present these suggestions for the next meeting of the Board of Burgesses.

Meeting adjourned at 5:11 p.m.
