Description of Existing Conditions

Pavement – The surface has failed and is pot holed in several stretches.

Drainage

Surface flow –the crown in the road is lower than desired to contain the drainage to the shoulders.

Shoulders – are generally adequate. The existing Curbing is no longer controlling the flow of water allowing it to spill onto neighboring properties.

Inlets – There are limited catch basins on this section. Some sections require additional basins and/or existing ones rebuilt.

Pipes – The condition of the pipes is not known. But replacement is needed due to their age.

Sidewalks – There are no sidewalks present.
